

Tic-Tac-Toe - Team 22

General Game Context

Tic-Tac-Toe is a classic and widely known strategy game played by two players. The objective is to be the first player to align three of your symbols in a row, either horizontally, vertically, or diagonally. The game is turn-based and requires players to think ahead, block opponent strategies, and control key positions on the board.

Within the board game platform, Tic-Tac-Toe functions as a compact yet complete game. Its simple rules make it immediately accessible, while its deterministic gameplay ensures consistent outcomes that are ideal for tracking results, player performance, and achievements across multiple matches.
