

# Checkers - Team 22

## General Game Context

Checkers is a classic two-player strategy board game played on a square grid. Players start with an equal number of pieces positioned on opposite sides of the board. The objective is to capture all opponent pieces or leave the opponent without any legal moves. Gameplay revolves around positioning, forced captures, and long-term planning.

As matches progress, players can promote pieces to kings, unlocking additional movement options and increasing strategic depth. The game rewards careful control of space, tactical sacrifices, and the ability to anticipate multi-step capture sequences.

## Game Information
